WORK HISTORY

September 2022 - Current

Web Developer, *Freelancing*, Kathmandu

Website Penetration Testing System (MERN Stack)

- Developed a system to automate security testing for websites.
- Integrated vulnerability scanning tools like SQLMap and Nikto.
- Implemented features for URL validation, scanning, and reporting using a MERN stack-based dashboard.

Shoe Store Management System (Django)

- Built a web-based inventory and sales tracking system for a shoe store.
- Implemented user authentication, product management, and order processing features.
- Utilized Django framework with PostgreSQL for data storage.

Agrifusion – Sustainable Development Hackathon Project

- Developed a web app connecting farmers with businesses and agricultural experts.
- Led backend development using Express.js and MySQL for a scalable architecture.
- Focused on bridging the digital gap for businesses in sustainable

shopping.

Custom Web Application Projects

- Designed and developed multiple full-stack applications using React and Node.js.
- Implemented RESTful APIs and integrated third-party services for enhanced functionality.
- Optimized performance and user experience using modern development practices.
